So you want to backup your ps2 games? You do not want one little scratch to destroy 50€ DVD-disk?

If you answer yes, this guide is for you.

You have two ways to do it:

Using software **Alcohol 120%**

Download it -> <http://shop.alcohol-soft.com/purchase.php>

Guide -> <http://www.dvd-burner.ca/DVD-Tutorials/How-Do-I-Copy-PS2-Games.html>

Using software **DVD Decrypter**

Download it ->

http://fin.afterdawn.com/ohjelmat/video_ohjelmat/dvd_rippaajat/dvd_decrypter.cfm

Guide ->

1. Start DVD Decrypter
2. Press "Mode" and select "ISO Read"
3. Then select read source and where to save
4. Push Decrypt-picture, so DVD Decrypter will move it to your HD
5. Press "Mode" and select "ISO Write"
6. Then select that ISO Image and push "Open"
7. Chose DVD-burning drive and burn speed (slowest possible, 1x - 2x)
8. Push "Burn the ISO"

IMPORTANT

You must have MOD-chip or boot disk like:

Modchop: http://teammodders.com/ps2_mc.php?ex=2

Swap Magic: <http://swapmagic3.com/>

Memory Card Exploit (Doesn't work with v.11 PS2 and later):

http://forums.afterdawn.com/thread_view.cfm/109289

HD Loader: <http://www.hdloader.com.au/hardinstall#prepare>

HD Advance: http://www.hdadvance.com/hd_advance_how-to-use.htm

Versio: 1.1
