What is Torrent Client?

- <http://en.wikipedia.org/wiki/BitTorrent>

What is the best client? What clients are there?

- There is no best client. Everyone will say they have the best client because they like it and it works fine in they computer.

But best way is to test and see what works in your pc.

Torrent Clients (for windows)

- Azureus <http://azureus.sourceforge.net/>
- BitTornado <http://bittornado.com/>
- BitComet <http://www.bitcomet.com/>
- Shareaza <http://www.shareaza.com/>
- BitTorrent Experimental <http://ei.kefro.st/projects/btclient/>
- BitBuddy <http://www.btvampire.com>
- TorrentStorm <http://www.torrentstorm.com/>
- XBT Client <http://xbtt.sourceforge.net/>
- BitSpirit <http://www.167bt.com/intl/>
- ABC <http://pingpong-abc.sourceforge.net/changes.php>
- BitLord <http://www.bitlord.com/download.php>
- BitTorrent <http://www.bittorrent.com/>
- G3 Torrent <http://g3torrent.sourceforge.net/>
- Burst! <http://krypt.dyndns.org:81/torrent/index.phtml>
- Turbo Torrent <http://turbotorrent.com/>
- TorrentTopia <http://torrenttopia.org/>
- TrustyFiles <http://trustyfiles.com/>
- Mldonkey <http://mldonkey.org/>
- BT++ <http://btplusplus.sourceforge.net/>
- Flash! Torrent <http://sourceforge.net/projects/burst-plus/>
- Nova Torrent <http://sourceforge.net/projects/novator/>
- PTC <http://prdownloads.sourceforge.net/ptc/ptc-1.0.0-RC.1.exe?download>
- TurboBT <http://sourceforge.net/projects/turbobt/>

Using Linux? Then here is clients for you:

- Gtk-Gnutella <http://gtk-gnutella.sourceforge.net/>
- aMule <http://www.amule.org/>
- Apollon <http://apollon.sourceforge.net/>

Do you want to compare clients?

- http://en.wikipedia.org/wiki/Comparison_of_BitTorrent_software

Should I know something else?

- I will give you something to think about...

Memory Usage of clients:

µTorrent 10.000K

Bitcomet 22.000K

Azureus 41.000K

Versio: 1.1
